

Ajay Rathod

Full Stack Developer

✉ ajgrathod2025@gmail.com ☎ 9403530292 📍 Pune 🇮🇳 Indian ♂ Male

🔗 frontend-xi-seven-63.vercel.app/

PROFILE

Full Stack Engineer with 3 years of experience in **Java**, **React.js**, **Node.js**, **Express.js**, **Typed.js**, and **JavaScript (ES6+)**, specializing in building scalable **RESTful APIs**, **microservices**, and backend systems. Proficient in **MySQL** for designing, implementing, and optimizing relational databases, with expertise in integrating third-party services. Skilled in **API testing** and **unit testing** using **Jest**, and experienced with **version control** using **Git**. Possess foundational knowledge of **AWS services** for deployment and cloud-based application management.

PROFESSIONAL SYNOPSIS

- **Front-end Expertise:** Proficient in developing Single Page Applications (SPAs) using **React.js**, **Redux**, **Flux**, **JavaScript (ES6+)**, **HTML**, and **CSS**, with strong DOM manipulation and JavaScript object model skills.
- **Back-end Development:** Skilled in designing, implementing, and integrating **RESTful APIs** using **Node.js** for scalable server-side applications, ensuring efficient data handling and business logic processing.
- **AWS & Cloud Services:** Knowledge of **AWS services** including **S3** for storage and **Lambda** for serverless computing.
- **UI/UX Design:** Experienced in creating responsive, high-performance, and accessible web applications with a focus on user-friendly interface design.
- **React.js Mastery:** Thorough understanding of **React.js core principles**, functional components (v16.8+), hooks, and component lifecycle.
- **Microservices Architecture:** Hands-on experience in developing and deploying modular, scalable applications using microservices.
- **Testing & Quality Assurance:** Proficient in **unit test writing**, **JUnit**, **TDD**, and API testing using **Postman** to ensure code reliability.
- **Authorization & Security:** Knowledge of modern authentication/authorization mechanisms such as **JSON Web Tokens (JWT)**.
- **Version Control & CI/CD:** Familiarity with **Git**, **SVN**, and modern CI/CD pipelines for automated builds, deployments, and version control.
- **Build Tools:** Familiar with modern front-end build pipelines and tools for efficient development workflows.
- **Routing & Endpoints:** Experienced in configuring routing and request handling in **Node.js** to manage multiple endpoints and HTTP methods.
- **Deployment:** Skilled in deploying full-stack applications on platforms like **Vercel** for fast, serverless hosting and seamless CI/CD integration.
- **Troubleshooting & Communication:** Strong debugging, problem-solving, and collaboration skills with excellent verbal and written communication abilities.

PROFESSIONAL EXPERIENCE

Software Engineer <i>HCL Technology</i>	2022 – 2024 Pune, India
Web Developer <i>Axolotls Innovative Technologies</i>	2021 – 2022 Pune, India

SKILLS

Programming Languages	Programming Skills	Integration
HTML, CSS, JavaScript, Bootstrap, Material-UI, Chakra UI	JavaScript, Node.js, React.js, Express.js, Typed.js, Java, Spring Boot, Microservices Architecture, AWS	Stripe, Google Map API, Twilio, WhatsApp, MYSQL, MongoDB, Third Party API

PROJECTS

Invoice Generation <i>Invoice Generation is the creation of a detailed document that lists products or services provided to a customer, along with prices and quantities and it serves as a formal payment request and records the transaction between the seller and buyer.</i> • Developed dynamic React.js components and Express.js routes to deliver end-to-end application functionality. • Built reusable React components and modular Express.js middleware to ensure efficient, maintainable, and scalable codebases. • Utilized JavaScript (ES6+) features, including async/await, for handling asynchronous operations in both frontend (Fetch API) and backend processes. • Implemented global state management in React using the Context API to simplify data sharing and maintain a clean component structure. • Conducted comprehensive API testing using Postman and created detailed API documentation with Swagger for team collaboration and validation. • Integrated error handling and input validation in backend routes to improve application reliability and security. • Optimized frontend performance using React memoization techniques and backend performance by applying Express.js middleware optimizations. • Deployed and managed applications in Vercel and Railway environments with CI/CD pipelines for faster releases.	2022 – 2024
DPS App - Debt Processing System <i>DPS App-Debt Processing System As a Software Engineer at HCL. Technology, am responsible for the development and maintenance of the Debt Processing System (DPS APP). This comprehensive system encompasses various features and modules critical to debt management and financial services.</i>	2022 – 2023

- Designed and developed **RESTful APIs using Node.js and Express.js** to handle data transactions between the frontend and MySQL database.
- Implemented **authentication and authorization** mechanisms using **JWT and Express middleware** to ensure secure access to sensitive data.
- Developed reusable components in React and integrated them into the application to maintain a modular frontend architecture.
- Performed **REST API** calls from React using **Axios and the Fetch API** to interact with backend services.
- Managed component state and **side effects** using React Hooks like **useState, useEffect, and useContext**.
- Managed code versioning and **collaboration using GIT**.
- Made REST API calls using **Axios and fetch** api in React

Site Ranker Pro - Website Analytics & SEO Monitoring Tool

2021 – 2022

Site Ranker Pro is a web application that integrates with Google Analytics and Google Search Console to monitor website traffic and SEO performance and provides insights into user behavior, keyword rankings, click-through rates, and page performance.

- Built **interactive charts and dashboards** using **React.js** and **Material UI** to display analytics with a clean, responsive user interface.
- Tracked **real-time and historical website traffic data** (sessions, users) for performance monitoring and insights.
- Managed **application state** in React with **useContext** and implemented **JWT authentication** for secure user login/logout.
- Integrated **API-driven data visualization** to dynamically update charts and dashboards based on live data.
- Optimized **chart rendering performance** using **memoization and lazy loading techniques** to enhance user experience.

EDUCATION	
Computer Science & Engineering	2016 – 2018
Dr. Babasaheb Ambedkar Marathwada University	Aurangabad
Diploma In Computer Science	2014 – 2015
M.I.T College Aurangabad	Aurangabad

PERSONAL DETAILS	
Nationality: Indian	
Language: English, Hindi, Marathi	
Gender: Male
