Profile

Full-Stack Developer experienced in **RESTful API development**, integrating with **MySQL, MongoDB**, and **Salesforce APIs (SCAPIs)**, and implementing secure, modular business logic. Proficient in writing **unit and integration tests** using **Jest** and **JUnit**, with strong expertise in **Git** for version control and collaboration in **Agile** environments. Additionally skilled in developing and customizing **Salesforce Commerce Cloud (SFCC) PWA Kit** storefronts to deliver fast, mobile-first, and engaging e-commerce experiences, with a focus on **performance optimization**.

PROFESSIONAL SYNOPSIS

- Over 3 years of experience in developing **scalable Java applications** using **Java 8+** and **Spring Boot**, with strong expertise in **RESTful API** and backend service development.
- Directed the creation of **Progressive Web Applications (PWA)** using **Salesforce Commerce Cloud (SFCC) PWA Kit**, delivering high-speed, mobile-optimized, and engaging e-commerce experiences.
- Modified and extended **SFCC PWA Kit storefronts** by integrating APIs, enhancing performance, and ensuring compliance with business rules, user interface standards, and brand identity.
- Implemented **SEO strategies** and optimized **core web vitals** to improve search engine rankings, reduce load times, and increase user conversion rates
- Developed **responsive front-end applications** using **React.js**, seamlessly integrating with Spring Boot APIs for real-time data interaction.
- Strong knowledge of **MySQL** and **MongoDB**, including database design, query optimization, and integration with **Spring Data JPA**.
- communication, and centralized configuration management.
- Skilled in **modern Java features** (Streams, Lambdas, Optional, Functional Interfaces) for clean, efficient, and maintainable code.
- Experienced in writing **unit and integration tests** using **JUnit**, and **@SpringBootTest**, ensuring code quality across service, controller, and repository layers.
- Implemented **JWT-based authentication** and **SSO** for secure API access and identity management.
- Proficient in **Git** for version control and collaborative development in **Agile/Scrum** environments, actively participating in sprint planning, daily standups, and retrospectives.
- Quick learner with adaptability to emerging technologies, particularly in **Salesforce development, API integrations, and system optimization**.
- Integrated **third-party services** with Salesforce and Spring Boot applications using REST and SOAP APIs for enhanced functionality.

Professional Experience

HCL Technology	2022 – 2024
Software Engineer	Pune, India
Axlotls Innovative Technologies	2021 – 2022
Web Developer	Pune, India.

Skills

Programming Languages	Programming Skills	Integration	Project Management
HTML, CSS, JavaScript, Bootstrap, Material-UI, Chakra UI	JavaScript, Node.js, ReactJS, Express.js, Salesforce APIs(SCAPI's), SFCC PWA Kit, Java, Spring Boot,	Stripe, Google Map API, Twilio , WhatsApp, MYSQL, MongoDB, Third Party API	RESTful APIs, JSON, Git, Unit Testing (JUnit, Jest), Agile Methodologies , microservices

Projects

DPS App - Debt Processing System

2022 – 2024

As a Software Engineer at **HCL Technologies**, contributed to the design, development, and maintenance of the **Debt Processing System (DPS App)** – a comprehensive full-stack application built to streamline debt management and financial services operations for enterprise clients.

- **Designed and developed secure, scalable RESTful APIs** using **Java 8+** and **Spring Boot**, implementing complex business logic for debt onboarding, repayment tracking, overdue alerts, and interest/penalty calculations.
- Followed a **clean layered architecture** (Controller → Service → Repository) in Spring Boot, ensuring modular, maintainable, and testable code.
- **Integrated MySQL database** with **Spring Data JPA** for efficient CRUD operations, optimized queries, and improved data retrieval performance.
- Built **responsive and interactive Single Page Applications (SPAs)** using **React.js**, focusing on usability, accessibility, and optimized performance.
- Managed **frontend state with Redux Toolkit**, including secure session handling, role-based access control, and seamless API data flow between client and server.
- Utilized **React Hooks** (useState, useEffect, useContext) to write clean, functional, and maintainable UI components.
- Implemented **JWT-based authentication** for secure API access and role-based authorization (Admin, Agent, Debtor).
- Used **Git** for version control, collaborating with cross-functional teams to ensure efficient branching, merging, and conflict resolution.
- Worked in an **Agile/Scrum environment**, actively participating in sprint planning, daily standups, and retrospectives to deliver features on schedule.
- Conducted **unit and integration testing** using **JUnit** and **@SpringBootTest**, achieving high code coverage and ensuring application stability.

Invoice Generation

2022 – 2023

Invoice Generation System Built a robust invoicing platform to automate billing processes, track services/products, and generate formal payment records between sellers and customers.

- Developed **React components** and **Express.js routes**, and integrated with **Spring Boot APIs** for secure backend operations.
- Created **modular middleware** in Express and **RESTful services** in Spring Boot to ensure scalable and maintainable architecture.

- Utilized **Java (Spring Boot)** for business logic and invoice generation workflows.
- Managed global state in **React** using `useContext`, and handled async data flows using `async/await`.
- Conducted **API testing** via **Postman** and documented backend endpoints using **Swagger** for seamless team collaboration.
- Implemented **PDF invoice generation** using server-side libraries, enabling clients to download and share professional billing documents.
- Integrated **MySQL** for storing invoice, customer, and transaction data, optimizing queries for faster retrieval and reporting.

Site Ranker Pro - Website Analytics & SEO Monitoring Tool

2021 – 2022

An analytics-driven web application that integrates with **Google Analytics** and **Google Search Console** to deliver actionable insights on website traffic, user behavior, and SEO performance.

- Built **interactive charts and dashboards** in **React.js** with **Material UI**, powered by backend services developed in **Java Spring Boot**.
- Integrated backend with **Google Analytics** and **Google Search Console APIs**, exposing **RESTful endpoints** for frontend consumption.
- Implemented **JWT-based authentication** with **Spring Security** to secure user access and manage active sessions.
- Managed application state using **React useContext** and built **real-time data visualizations** for SEO metrics.
- Implemented asynchronous processing in both frontend (`fetch/Axios`) and backend (Java async APIs) for improved performance.
- Deployed the application on **AWS EC2** with **CI/CD pipelines**, enabling automated builds, testing, and deployments.

Education

Dr. Babasaheb Ambedkar Marathwada University

2016 – 2018

Computer Science & Engineering

Aurangabad

M.I.T College Aurangabad

2014 – 2015

Diploma In Computer Science

Aurangabad
